Experience

Founder — deftstud (web studio) Building and operating 2026 – Present
Running deftstud, a website design and development studio for small businesses, building sites for clients. *Mumbai*

- Founded and operate a web studio focused on designing and developing websites for small businesses.
- Manage the end-to-end client lifecycle, from outreach and requirements gathering to development and delivery.
- Handle project scoping, client communication, service delivery, and post-delivery requests independently.

Founder — deftweb (web service agency) Late 2024 – Mid 2025
Founded deftweb, a web services agency, later closing it to focus on studies and new ventures. *Mumbai*

- Established and operated a web services agency, managing projects, project coordination, and website delivery.
- Translated business requirements into solutions, and managed projects through completion.
- Managed client relationships and service requests independently before winding down operations to focus on academics and new ventures.

Projects

SQL Data Warehouse & Analytics | *SQL, mySQL, T-SQL — Guided Project* May 2026

- Completed a guided project (Data With Baraa course) building a data warehouse using Medallion architecture (Bronze, Silver, Gold layers).
- Practiced ETL pipeline structure, data modeling, and T-SQL fundamentals through hands-on implementation.

Feelingslog | *Kotlin, Android, AI Tools/Agents* Sep 2026 – Present

- Building a native Android app to log feelings and moments with different file types in each Logs.
- Learning Kotlin and Android fundamentals hands-on with AI tools as a beginner.

arkx — Personal Portfolio | *React, TypeScript, React Architecture Pattern* Jun 2026 – Present

- Building a personal portfolio website with React to learn the framework hands-on and showcase future work.
